

# FUN FACT COLORING:

## ANIMALS IN THE AMAZON RAINFOREST!

Our creative God made every animal unique and full of amazing abilities! Whether it's a monkey who can jump 9 feet

to catch the next branch or an anteater with a 2-foot tongue, each creature shows God's creativity and wisdom in a special way. Isn't it exciting to know the same God who made these incredible animals made you too?

**WOW, GOD!**

"O Lord, what a variety of things you have made!  
In wisdom you have made them all. The earth is full of your creatures."  
(Psalm 104:24 - NLT)

# GIANT ANTEATER

God gave  
giant  
anteaters  
crazy-long  
tongues—  
about 2 feet  
long! Their  
sticky tongue  
shoots in and  
out about 150  
times a  
minute—  
perfect for  
slurping up  
ants and  
termites.

**LICKITY-SPLIT!**

# TOUCAN

**Toucans are  
one of the  
noisiest birds  
in the world!**

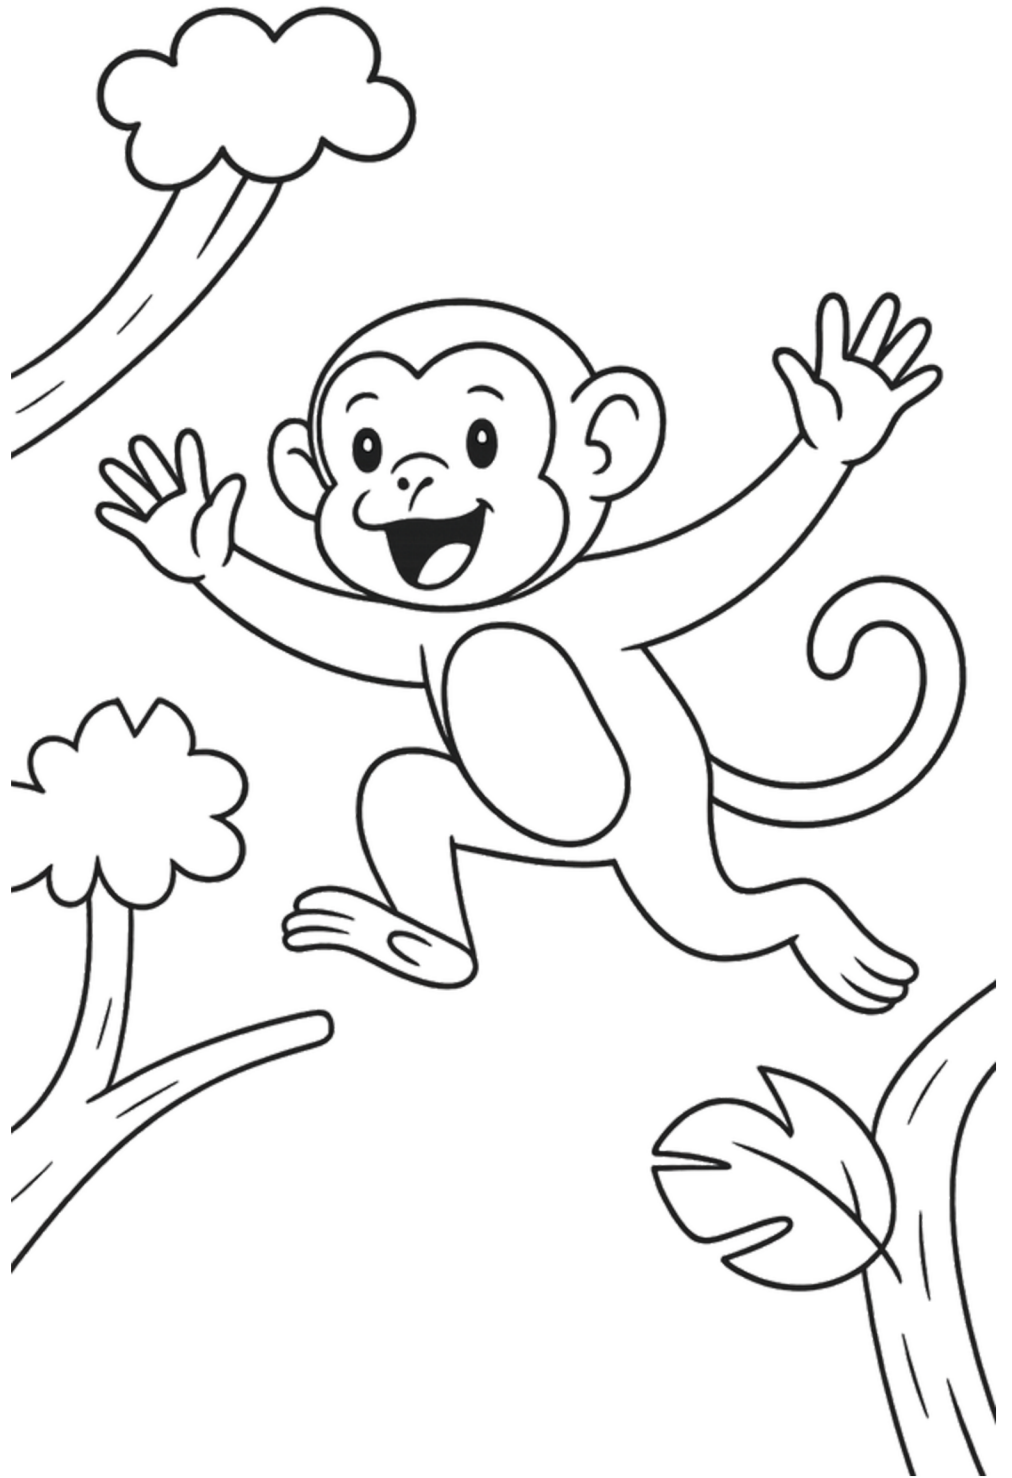

**Their  
“singing”  
sounds more  
like a frog  
croaking, not  
to mention  
their barking,  
growling,  
braying,  
tapping, and  
clattering. No  
napping when  
a toucan is  
nearby!**

## **LOUD MOUTHS!**

# CAPUCHIN monkey

Capuchin monkeys spend most of their time in trees, but that doesn't keep them still! Their primary form of transportation is jumping—and they are known to jump 9 feet, from branch to branch. Look out Tarzan!

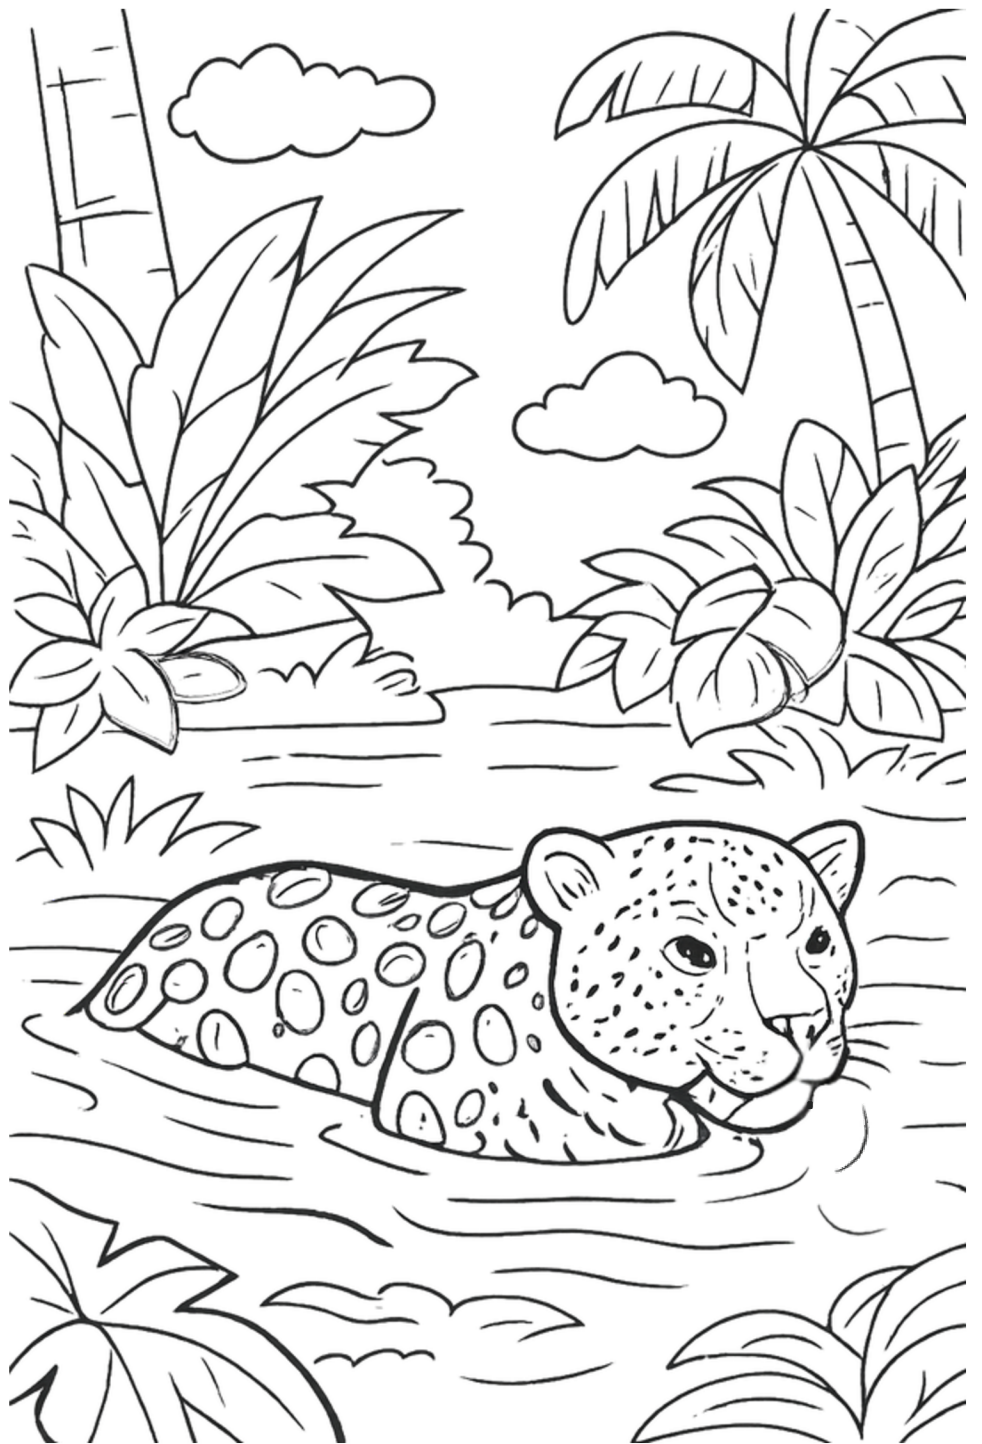

## **AERIAL ACROBATS!**

# JAGUAR

Most cats are considered land animals, but God gave jaguars some serious water skills! They are such accomplished swimmers that some have even crossed expansive waterways, including the Panama Canal! Who knew big cats could make such a splash?

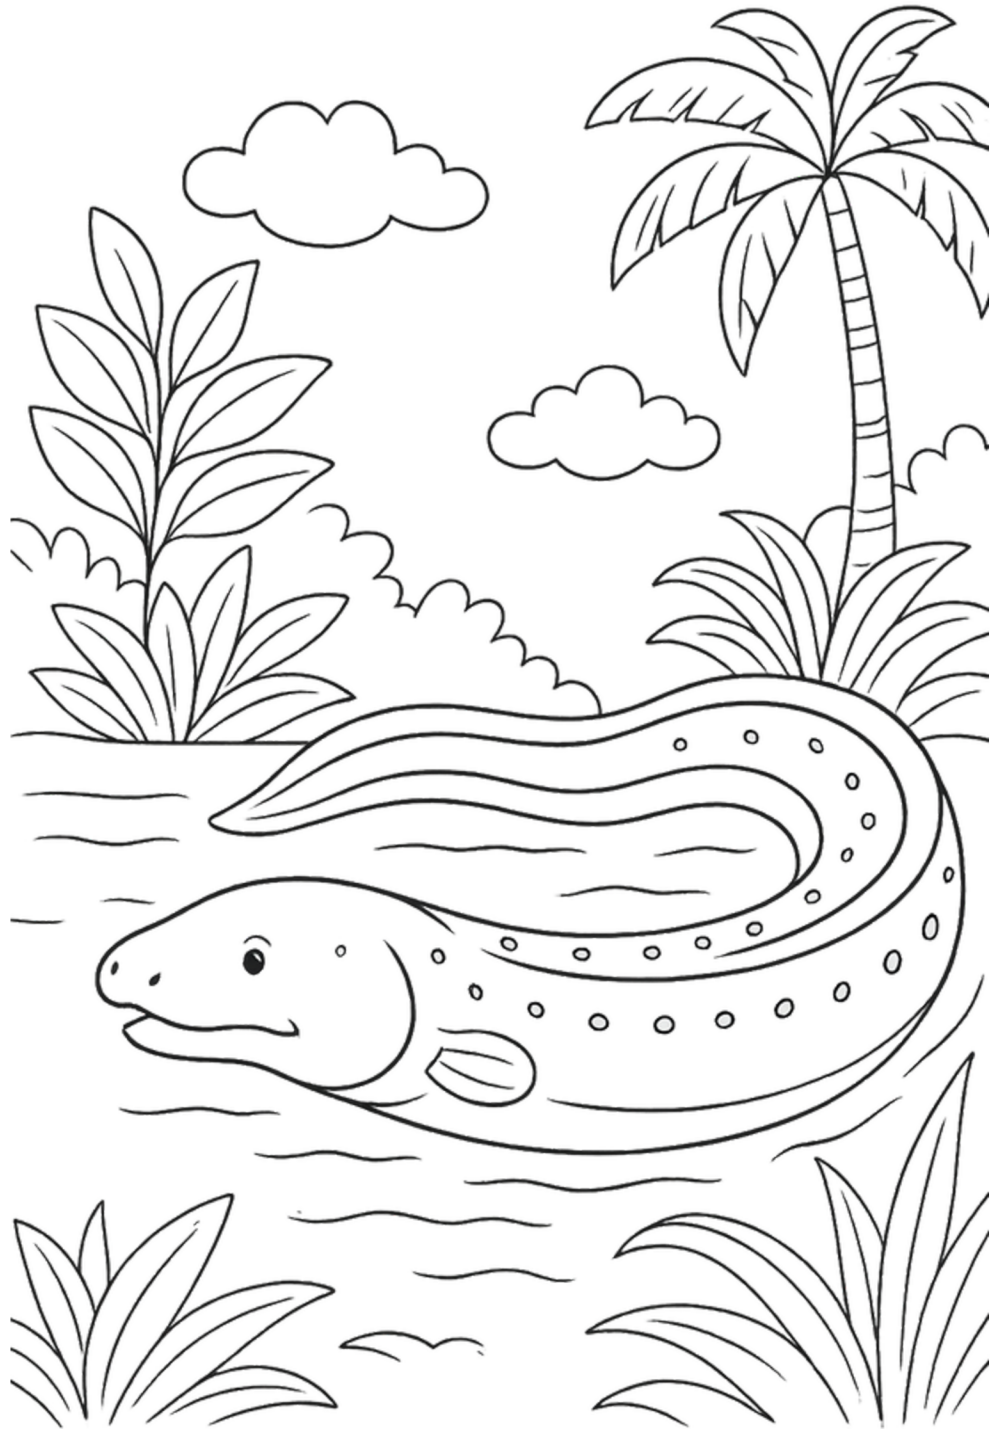

## AQUA CATS!

# **eLECTRIC eel**

**ZAP!**

**Electric eels  
can shock  
their prey (or  
predators!)  
with jolts up  
to 600 volts—  
that's nearly  
enough to  
power 100  
lightbulbs at  
once! God  
made a  
seriously  
electrifying  
fish!**

## **eel-ECTRIFIED!**

# SLOTH

**Sloths just might be the slowest and laziest creatures of all! They sleep up to 18 hours a day, live in the same tree for years, and take so long to digest food that they only go potty once a week. Now that's some creative chill!**

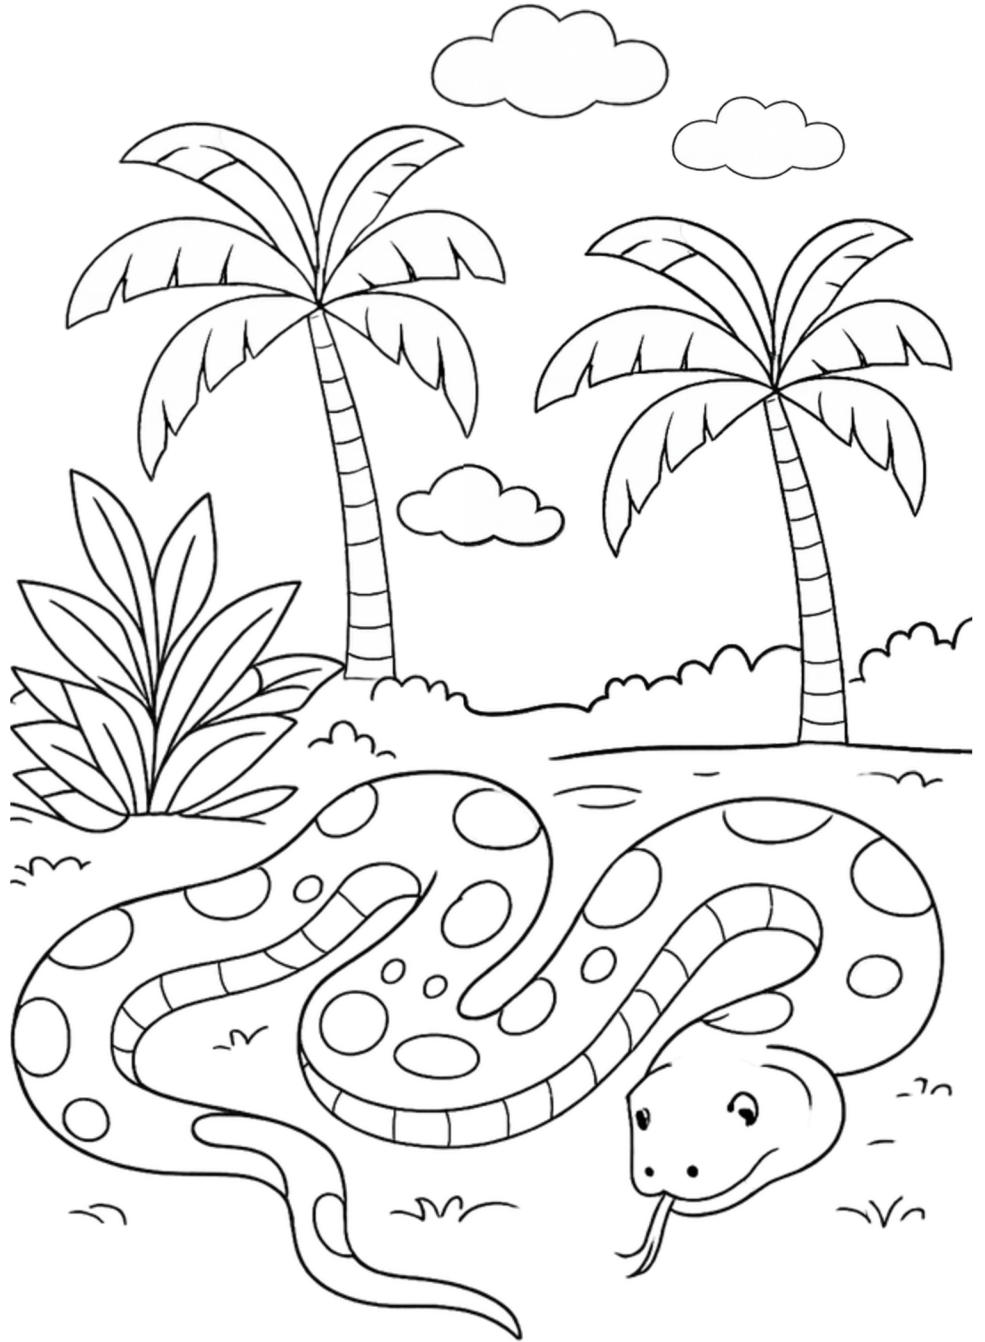

## **SLEEPY HEADS!**

# GREEN ANACONDA

Green anacondas aren't just long—they're record-breakers! These super snakes can stretch 20 to 30 feet (as long as a school bus!) and weigh up to 500 pounds—about the same as a grizzly bear. It's no surprise they can swallow a jaguar whole!

## **SNAKEZILLA!**

# HOATZIN

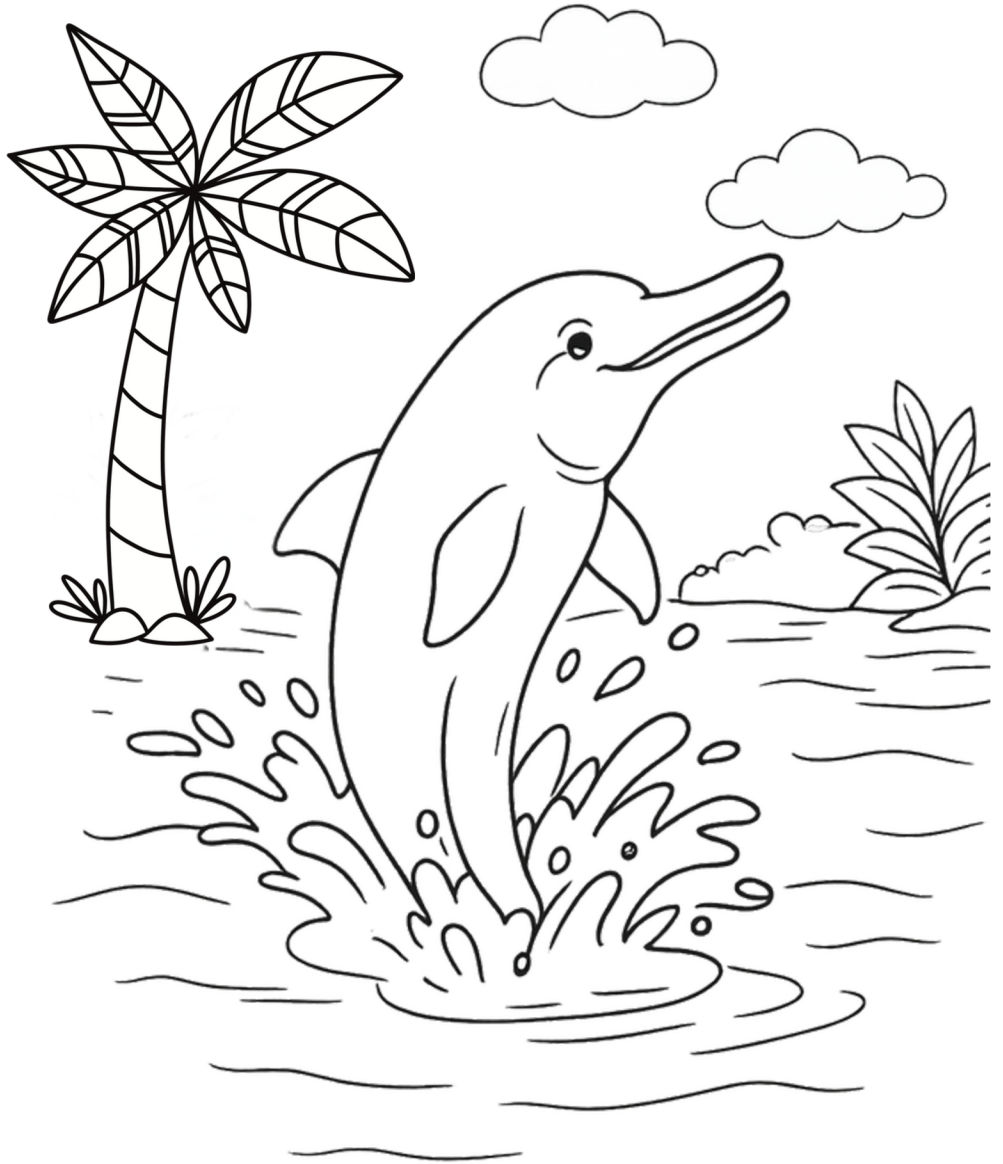

The hoatzin—  
also called the  
“stinkbird”—is  
said to smell  
like cow manure  
because it  
digests leaves  
by fermenting  
them in its  
belly, just like a  
cow. That stinky  
gas keeps most  
predators far  
away!  
Pee-ew!

## STINK BIRDS!

# AMAZON RIVER DOLPHIN

Amazon river dolphins aren't born pink—they earn it! These playful swimmers start out gray, but all their splashing, scuffling, and bumping turns their skin pink with scar tissue. Only God could make scars so pretty!

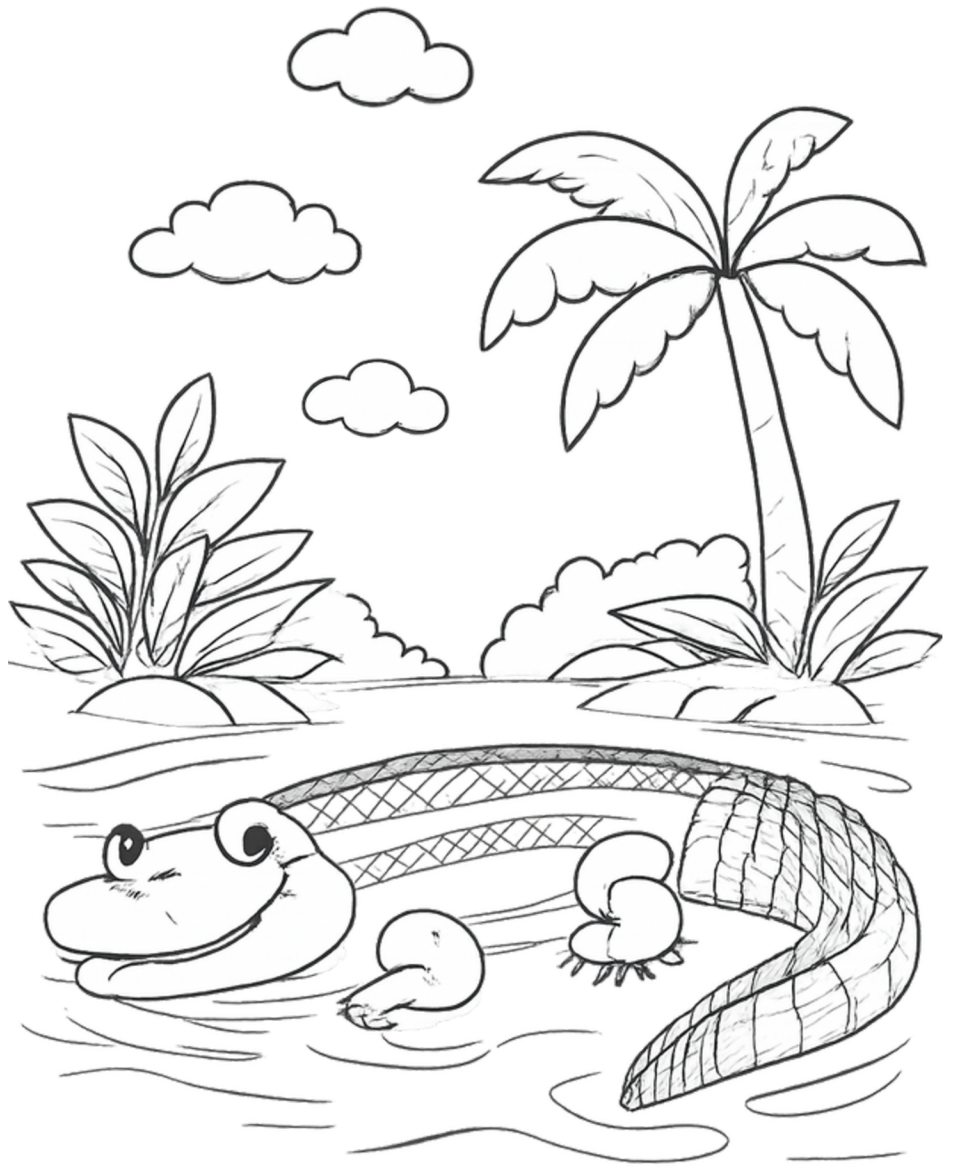

## PRETTY IN PINK!

# CAIMAN

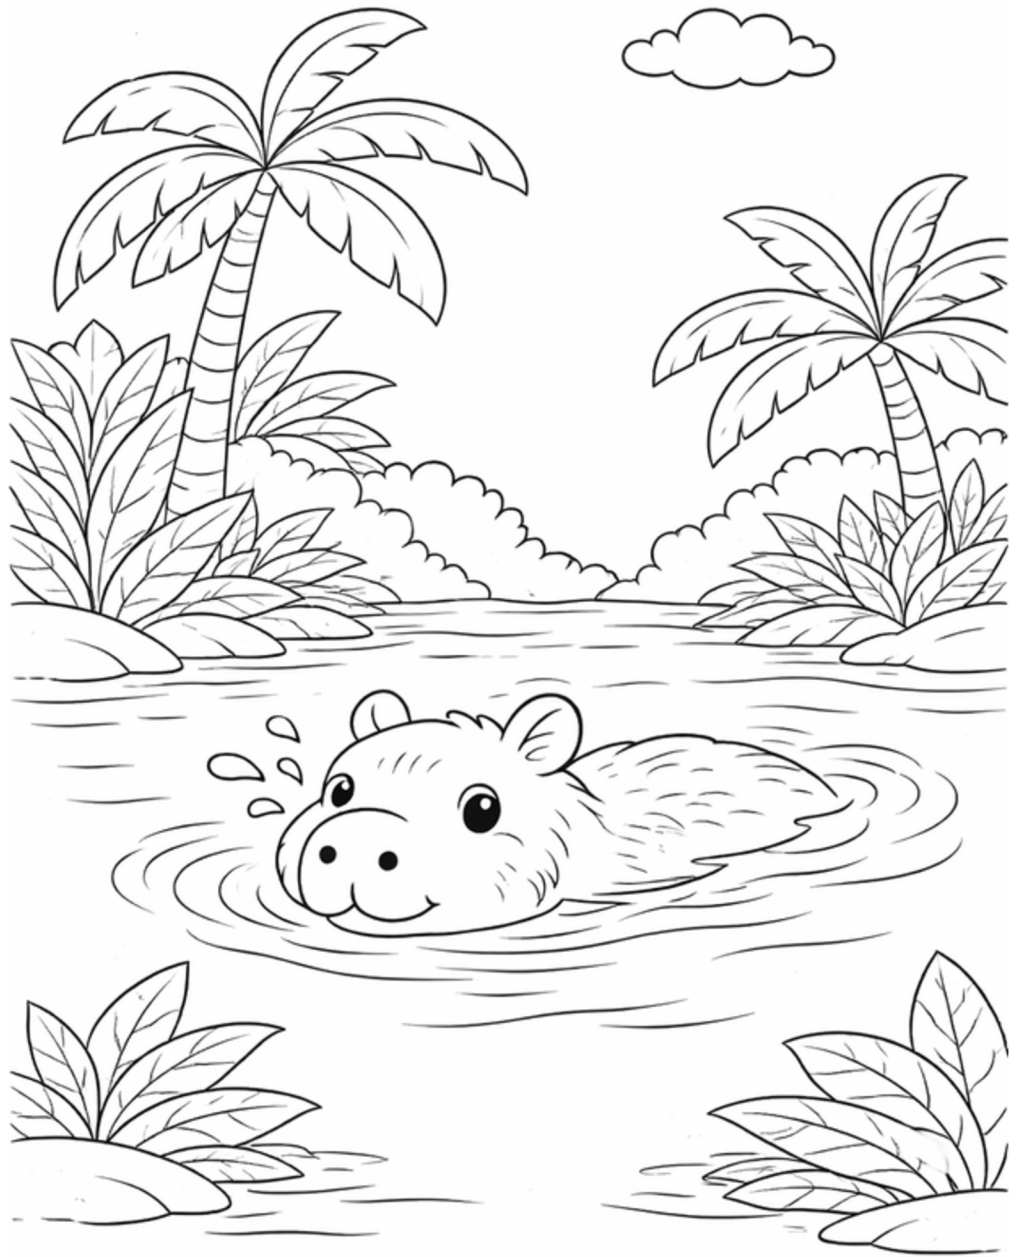

Caimans never worry about losing a tooth—God designed them to grow new ones! As their old chompers wear out, fresh ones pop in to take their place. Over a lifetime, a caiman can grow thousands of teeth. Now that's a toothy grin!

## **new CHOMPERS!**

# CAPYBARA

The capybara may be a rodent, but it's no ordinary mouse! These 100-pound gentle giants have webbed feet and can hold their breath for nearly 5 whole minutes—God's perfect design for a champion swimmer!

## WEBBED WONDER!

# MACAW

With feathers  
like a rainbow,  
the scarlet  
macaw is a  
showstopper!  
Even cooler—  
God made them  
able to eat  
plants that are  
poisonous to  
most animals,  
without  
getting sick.  
Now that's one  
fearless  
feeder!

## POISON-PROOF!

# GLASS FROG

This tiny glass frog is a Kermit lookalike! With big, bulging eyes and bright green skin, he's a miniature twin of the famous Muppet. And when he wants to impress a girl frog, he even whistles like Kermit too! Talk about a hoppy tune!

## TOAD-ALLY KERMIT!
